

The Carriage House Edition

MODEL 246 Steel Carriage House Doors

The Carriage House Edition Models are high quality, low maintenance garage doors designed to add distinction and value to any home. Constructed of galvanized steel, the Models 246 offer strength and durability without sacrificing beauty and elegance. Available in pre-finished colors, the Carriage House Edition Models carry a Limited Lifetime Warranty against rust through, warping or cracking. Optional features include insulation for improved energy efficiency and glazing options for visibility and style that will compliment any home's architecture.

The Carriage House Edition

MODEL 246 Steel Carriage House Doors

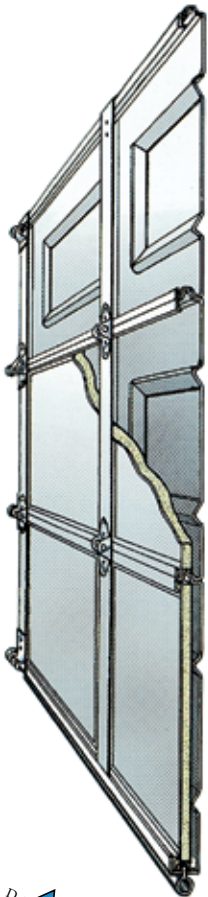

Embossed Wood Grain

The **Model 246** gives you the beauty of rough sawn wood grain and the strength of steel. Craftsmanship, engineering, and options make these doors an added value to any home in any environment.

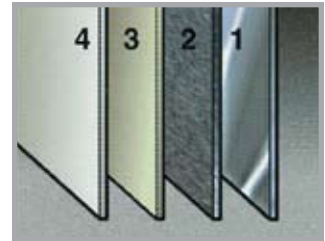

Practical, Efficient, Versatile

The **Carriage House Edition Models** are constructed from 24 gauge hot dipped galvanized steel to assure years of use without the worry of warping, cracking, or rotting. The **Model 246 Carriage House** doors are pre-finished in your choice of white, brown, almond or sandstone. Options include energy efficient CFC free insulation panels and two window styles. This versatility allows you to order a door of your desired performance and visual requirements.

The **Model 246** is covered by a **Limited Lifetime Warranty**. Just one more advantage that assures you are purchasing the most trouble-free door available. We wouldn't have it any other way.

- 24 gauge hot dipped galvanized steel adds strength and protection from warping and rusting.
- Heavy 14 gauge steel, commercial hinges provide added durability.
- High quality, nylon rollers provide maximum strength and long life. (Optional 10 ball rollers are available.)
- Tongue and Groove design on each section prevents wind, rain, and snow infiltration.
- Stiles Tog-L-Loc® to meeting rails, center stiles bonded to panels with industrial adhesive and end stiles also Tog-L-Loc®, offering superior strength and support.
- Bottom section includes a heavy vinyl weatherstrip, fitting the contour of the floor and a seal against weather and nature's elements.
- Optional 1 3/8" vinyl covered insulation provides increased energy efficiency, quieter operation and is held in place with white steel style covers. (Code L)

Protective Paint System

This three tier corrosion-resistant protection is designed to repel even the most hostile weather conditions. The protective layers found on both the *interior and exterior* are:

1. 24 Gauge Steel
2. Hot Dipped Galvanizing
3. Epoxy Primer
4. Finish Coat
